What Happens TO AGRICULTURE'S WATER?

1

Agriculture water delivered to California farm totals: 34.1 million acre-feet

41.1% of the entire state's water use

Agriculture uses water to grow half of the nation's food supply

2

73.9% of farm water is converted into food and fiber

The food we wat and the clothes we wear

3

The remaining 26.1% of the farm water returns to rivers, lakes or refills groundwater aquifers

Recycled and reused
