

August 3, 2019

Dear Friend,

Water is life in California. Earlier this year, Sacramento politicians introduced Senate Bill 1 (SB1) which seeks to inject politics into California's environmental regulations. SB1 will restrict water deliveries to the Central Valley and make California even more unaffordable. **SB1 puts our communities in danger.**

The California Water Alliance is a non-profit and non partisan organization with a mission to increase the water supply for municipal, agricultural and environmental needs. We have been working with a digital public affairs company, to raise awareness about this dangerous piece of legislation.

SB1 will be considered in the California Assembly Appropriations committee later this month. Time is short.

As written, SB1 would freeze the existing federal biological opinions. Future permits would be subject to outdated science and ineffective federal baseline measures, thus permanently, constraining the coordinated operations of the Central Valley Project and the State Water Project.

SB1 will hurt disadvantaged communities throughout California with inconsistent state and federal regulations. This bill will compromise access to drinking water and limit economic prosperity. The California Water Alliance is leading the charge on SB1 by engaging voters and demanding that Sacramento politicians Fix or Nix SB1.

We need your help. Please consider donating to the California Water Alliance by visiting <https://californiawateralliance.org/donate/>.
